-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Specification

The examiner has not checked the specification to the extent necessary to determine the presence of **all** possible minor errors (grammatical, typographical and idiomatic). Cooperation of the applicant(s) is requested in correcting any errors of which applicant(s) may become aware of in the specification, in the claims and in any future amendment(s) that applicant(s) may file.

Applicant(s) is also requested to complete the status of any copending applications referred to in the specification by their Attorney Docket Number or Application Serial Number, **if any**.

The status of the parent application(s) and/or any other application(s) cross-referenced to this application, **if any**, should be updated in a timely manner.

Applicants should note that the continuing data set forth in the specification is not consistent with the declaration or with PTO records. The data refers to 60/103,677. The examiner considers the instant application entitled to the benefit of 60/267,471.

Election/Restriction

Claims 25-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on November 26, 2004.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18-23 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0,278,535.

The instant claims are drawn to an anionic clay composition set forth in product-by-process language. The process of making the composition differs from that claimed herein by applicants; however, the composition produced would not appear to be patentably distinct from that produced by EP 0,278,535. The claims merely recite shaped bodies, which would also be produced by the prior art. Composite particles with binder will also be made by the prior art process and it would not appear that this product would differ from that claimed by applicants. Accordingly, it is proper to shift the burden to applicants to demonstrate how the claimed product differs from that produced by the prior art. See particularly the prior art examples.

Allowable Subject Matter

Claims 1-17 are allowable over the prior art of record. The claimed process conducts the ageing step on the shaped bodies rather than on the precursor mixture. Accordingly, the clay is formed at a different time in the process and such is not taught or suggested by the prior art of record.

Conclusion

Applicants are advised that any evidence to be provided under 37 CFR 1.131 or 1.132 and any amendments to the claims and specification should be submitted prior to final rejection to be considered timely. It is anticipated that the next office action will be a final rejection.
